There was a slight reaction in the stock market to day. The movement at the opening was actively upward, but if grew weaker at the close. At the first board, Cumbergand coal advanced 1 per cent; Nicaragua Transit, 1/4; N. Y. Central bonds, 1/4; Canton Co., 1/4; Hudson River Railroad, 1/4; Frie Railroad, 1/4. Michigan Southern Enilroad declined 1 per-cent. There were large transactions in Eris, bayers' option; and if the bears are not careful they will find themselves too the bears are not careful they will find themselves too short for comfort. At present prices speculators will buy without any regard to the actual value of the stock; and this may not only arrest the downward movement value entirely upon its merits, it would be selling now for less than fifty per cent; but it has been held so largely by speculators, and has been the football for both balls and bears so long, that it has now an artificial value, which fluctuates frequently is nor fifteen per cent in as many days. The tears may make a great mistake in fol-owing Frie down much farther. It may turn upon them, and trouble them exceedingly. The reaction to-day was pretty general; but we have no idea that it will be remanent. After lawy stocks have been for semetime steadily settling down, then comes a pause, a ball, a neavy, inactive period, whom no one seems disposed to buy or reli and a dull, depressed state of things prevais, during which it generally appears as though all speculative spirit was deal—as though another excitement in fancy stocks was utterly out of the question. Wall street becomes deserted by outsiders, and the enormous load of unproductive scenarios rests in the hands of those little able to carry it. After a while some particular fancy will take a start, another will soon follow, and so on until we find an active movement going on and speculation again prevalent. These excitements appear and disagners without any real cause. Fancy stocks go and disappear without any real cause. Fancy stocks go up and down, no one knows why or wherefore, and no one but speculators care. The decline which has been so rapid for some days past will not continue much beger; but the depreciation will become chronic, and it will be very difficult to get up another inflation. The present depression will be contained by the growing district in the public mind, and those who have been sought with productive stocks in hand will have to contain themselves with their divisions, but those who at high prices had better carry them at moderate sacrifices, with the hope of ultimately making up their losses.
It is pretty certain that the stock market cannot present,
a more gloomy aspect than at this moment. It matters
httle what may be the state of the money market, or
the position of commercial affairs, the decline in stocks
has about reached its minimum. We speak of prices
generally. We cannot answer for certain railroad
stocks which have no real value, but it is our impression stocks which have no real value, but it is our impression that buyers at current rates, on sixty and ninety days,

will make money by a rise within that time.

The steamship Canada, at Halifax from Liverpool, brings one weeks later intelligence from Europe. The news possesses no interest, and does not appear to be, so far as we can judge by the telegraphic despatches, of the alightest importance. Breadstuffs were lower and cotton higher, but the variations in quotations were trifling. Consols had declined a fraction. We have no details regarding financial affairs, and cannot, therefore, speak garding financial affairs, and cannot, therefore, speak advisedly. It is reported that the Bank of England had increased its bullion in hand. This is just the reverse to what we have anticipated, and doubt its truth. Po-litically, the advices do not differ from those received by

The Chemical Bank has declared a dividend of six per sent. The Providence and Worcester Railroad Company a semi-annual dividends of four per cent.

The amount received at the office of the Assistant

Treasurer of the United States for the port of New York, this day, June 21, 1854, were \$79,030; amount paid out, \$83,092 09, leaving a balance on hand of \$8,982,872 28. The current operations of the Treasury Department on Monday the 19th of June, were as follows :-

The Boston Transcript of the 20th inst. says:—"The market was very quiet this morning, with a better demand for some of the faucies, particularly Central and Ogdenzburg, both of which closed firm. The bears are hammering Wilmington pretty hard, with a fair prospect of reducing the market value, unless some of its friends come forward and support it. Dividend stock are generally heavy. Worcester declined to 96% ex-dividend; Fitchourg, 86% asked; Eastern, sales at 77% diven; Boston and Providence, 80% div. on, payable Oct. 1, on; Boston and Providence, 80% div. on, payable Oct. 1 with interest. Northern declined to 4014, under a forced male of a few shares, but rallied again and sold at 11, meller six months, the same being bid regular at the close. Western was in demand, at 98 bld, div. on, without sales. Copper shares were more active, with an improvement in Minnesota, North Western and Copper Falls. Dana and Winthrop declined. Land stocks are beavy, and sell at reduced rates."

The Delaware, Lackawana and Western Railroad Company has called for a further instalment of fifteen per sent., payable on the 1st of July, at the Phoenix Bank in this city. The Managers have resolved to pay the stock holders, on the 10th of July next, interest at the rate of six per cent. per annum, to be computed to Jun 30, 1854, on all stocks issued or instalments received previous to the 1st January last, from December 31, 1853, and in instalments received during the present year, from the dates of the respective payments, where no instalments which have been called for remain unpaid.

The stock of hemp now in St. Louis, it is stated, is not far from 8,000 bales. Say 5,500 in store unsold; 1,500 to 1,805 sold and in manufacturers' hands; 800 to 1,000 at the levee and affort. The total quantity on the market unsold is between 6,000 and 7,000 bales. Tels is a good supply for so early a day in the season, and, un s shipping facilities are increased, the stock, it is thought, must continue to accumulate. The banks of New Orleans presented the following con-

dition at the close of the week enging June 10, 1854. Banes of New Ontrans.

Mechanics' and Traders' Bank, in city bonds ... According to this there has been a decrease in every

department, in each to some extent, except discounts. There is very little being done in dry goods. Spring purchases have all been concluded; and in view of the warm summer months, merchants are not inclined to renew operations for some time hence. Mean while, with wn accumulating stock of most articles and an soxiety on the part of owners to close out old fabrics, prices are tending downward-the condition of the business being extremely unsatisfactory and discouraging. Still, it is not so had in this respect as had been acticipated, and should future movements be upon a sounder basis, we

do not fear but that the trade will accupe from existing difficulties with more enlightened views of more at il polity, and, perhaps, more rational expectations, which their severe experience will assist them to realize. The transactions in brown and bleached sneetings and short-

have been commenced. In anticipation of these the supply is now being perfected, and we understand that it is to be tendered at 11c. for Manchester, and 11½c. for Glasgow and Lancaster.
